

The Fourth Dimension

Scene 0 The Beginning

The world is under the threat of an apocalypse. Humans have been draining the world from its resources, causing a slow destruction of nature. Despite Mother Earth's warnings, humans have not yet been listening to her words.

Mother Earth is incarnated through The Tree of life and holds the power of the Fourth Dimension, the dimension of time. Mother Earth created time in order to make the world a habitual place for nature and its creatures since a timeless world is impossible to live in. Time gives nature a course and the ability to progress and give and hold life. Without time there would be no events, no cause, no effect, no course. Nothing would be able to change or progress, there would be no before nor after. Causality would collapse and therefore time and life itself, because nothing would have a meaning and the world would be stuck in a static condition. As a result all living creatures would be put in this static condition, with no ability to experience existence. Thus, we wouldn't know if we're existing or not, we would be stuck in a frozen moment, stuck in timelessness.

The existence of earth is crucial for the existence of the universe as a whole, since earth is working as a lifeforcer and a balancer in the universe. Man's draining of the world and its resources has caused an imbalance in the universe. This cause of imbalance has made the universe increase its acceleration leading to a change in the speed of which the universe is normally expanding at. These changes in how the universe is expanding has led to changes in how spacetime curves. The Tree of Life, which holds the power of The Fourth Dimension, is forced to resort to its last defense, by slowly creating more and more extreme weather on earth, slowly making it more and more inhabitable to stop people from destroying it and therefore destroy all life.

Do you dare to try to save the World?

BTN: Begin

Scene 1 Glimpse of The Green Cat

You are John, a theoretical physicist student at home watching the news. Once again scientists are warning about changes in the universe where the cosmic background radiation becomes more difficult to measure, which indicates that light particles move more slowly as a result of distortion of spacetime. This is a clear sign that the imbalance on earth has now led to an impact on the entire universe and that the dreaded state of a static universe is only a matter of time. You are devastated about this. You and your friends from the organization "Earth for Space - Space for Earth" have worked hard trying to inform and educate the society about the changes that one has to make in order to prevent this catastrophe from happening. Although there are a lot of people willing to make a change, the amount has not been enough. You then glimpse something green outside your window and hear the sound of a cat, you decide to:

LEFT BTN: Ignore what you just heard and continue to watch tv

RIGHT BTN: Go outside and follow what you now understand is a green cat named Alpha. Alpha leads you to a rabbithole, you then enter the rabbithole

Scene 2 Watching tv

You find yourself in front of your tv again, watching the news broadcast about the future of Earth, humanity and the universe as a whole. A wave of feelings of apprehensiveness floods over you and you:

LEFT BTN: Can't stand to hear about this anymore, they must be exaggerating you say to yourself and decide to ignore the information

RIGHT BTN: Take the message seriously and decide to go out and follow what you think might be a green cat

Scene 4 Collapse

"Ignorance is equal to destruction, the apocalypse is now upon you"

- Mother Earth

LEFT BTN: Ska tas bort

RIGHT BTN: Restart

Scene 3 The Rabbithole

Once inside the rabbithole you meet up with the Riddling Rabbit and you're faced with solving this riddle before you and Alphaba can continue. The riddle goes like this and you decide to:

"I am the parent of civilizations, the killer of heroes. Without me, you cannot survive, but embrace me too much, and you'll cease to thrive. What am I?"

LEFT BTN: Regret ever coming here and go back home to watch tv

RIGHT BTN: Solve the riddle and enter the portal to planet Alvograth

Scene 5 Planet Alvograth

Through a portal that became visible after solving the riddle, you've now entered the desertlike planet Alvograth. You and Alphaba find yourselves in front of the entrance of The Maze of Reflection. Alphaba hands you a letter. The letter is from the Riddling Rabbit and says: "Once you find what you should be looking for, be sure to pick them both up, in the end you will need to collect what you've dug up." The letter then crumbles in your hands and you look confused and:

LEFT BTN: Give up and go home

RIGHT BTN: Begin the search for the needed items

Scene 6 May you find what you're looking for

You've found a small casket and a shovel. You keep repeating the letter from the Riddling Rabbit in your head and repeat out loud "...in the end you will need to collect what you've dug up", and say to Alphaba, -I think we have to enter the maze and dig for something in the end of it, I just hope we'll get to there. You:

LEFT BTN: Hesitate and want to give up and go back home

RIGHT BTN: Enter the maze

Extra: Pick up shovel and casket

Scene 7 The Maze of Reflection

You and Alphaba have reached the end of the maze, while you take a deep sigh of relief at having made it through the maze, the maze closes behind you. On the wall of the maze an image appears that at first looks like water, the image then starts to reflect on the ground in front of you, and you say to Alphaba, -I think we're supposed to dig here. Without knowing what you're searching for:

BTN: You start to dig

Scene 8 The Portal Back

You've found what looks like a green crystal and say, -It has the same green color as you Alphaba, I think we just found what we "should be looking for".

You put the crystal in the small casket. Alphaba yawns and heads towards of what looks like a portal and you:

LEFT BTN: Hope this is the way back because you just want to give up and go home

RIGHT BTN: Follow Alphaba into the portal

Extra: Pick up the crystal

Scene 9 The Tree of Life

Once through the portal you find yourself and Alphaba back on Earth. The place seems familiar, yet you don't recall being here before. In front of you stands the most astounding grandiose and beautiful tree you've ever witnessed. A warm wind sweeps through and the tree starts to talk,

-I am Mother Earth, incarnated in The Tree of Life. I am the Mother of all living and the protector of The Fourth Dimension.

Mother Earth asks Alphaba to hand over an infrared telescope to you and says,

-Now look through it towards the sky, what do you see John? You answer,

-That there seems to be a lot of red light up there, is this the phenomenon of redshift due to the expansion of the universe?

Mother Earth replies, -Indeed it is, this is what happens when the wavelength of light is being stretched out due to the accelerated expansion of the universe caused by the imbalance of the Earth. The universe has increased its acceleration leading to a change in the speed of which universe is normally expanding at, that is why you see an extreme redshift and that is why time is about to collapse. The crystal you found contains Stellarplankton. This substance has extreme photosynthetical properties and therefore possesses the power of reversing the negative climate effect human has caused the earth, by normalizing the CO₂-levels and give nature the chance to heal. This will then slow down the expansion of the universe, normalizing space warp and therefore time. Time will go back being relative and not timeless. But Before this is possible you'll need to plant the Stellarplankton right here in The Tree of Life, then Stellarplankton can unleash its powers.

You:

BTN: Finish planting the Stellarplankton in The Tree of Life

Extra: Put down the crystal

Scene 10 Holding the power of The Fourth Dimension

The Stellarplankton has made it possible for The Tree of Life to incapsulate CO₂ and make it dissolve. This has made Earth regain its role as a universal balancer. The expansion of the universe is slowing down and space warp is normalizing. The world is no longer being threatened to be put in static timeless condition since The Fourth Dimension is now saved.

You did it!
